

OPEN APPLICATION EXAMPLE / Teekkarin työkirja 2018

Application for a Master's Thesis position

I am looking for a position as a Master's Thesis worker and Propulsion Solutions would be my first choice. The Prop Company has been successfully developing technologies which are changing the industry. I met your company representative Mr. Tom Larsson during the Campus Career Fair in January 2018 and he encouraged me to send an application.

I am a fifth year Engineering Design and Industrial Management student. In my Master's Thesis, I would like to apply the engineering design and product development skills, that I have acquired during my studies and when working on my Bachelor's Thesis. A project on energy efficient motors would be particularly interesting. The success of the award-winning, energy efficient Putsvek-motors has been something I have followed with eagerness.

My study projects at Aalto University and my exchange/internship period in Switzerland have proved I can work efficiently in international teams and working environments. I am fluent in English and have good working skills in Spanish. I believe that 15 years of playing team sports, has helped me to build my people skills. On my own time, photography and photo editing is a hobby that helps me relax. It also proves my attention to detail.

I would be happy to relocate in Finland or to another European country. I would be available to start work in March or later.

I look forward to an opportunity to discuss with you personally. I will contact you again next week.

Regards

Maria Tallus
